

• **MELTS FAST
TO TEMPS
AS LOW
AS -20°F!**

• **THE MOST
POWERFUL
BLENDED
ICE MELT
AVAILABLE**

If you can't settle for anything but the best, look no further than PATH MAKER. PATH MAKER is a powerful ice melter specifically formulated for High Performance melting in the industrial and commercial markets. Instantaneous melting and low temperature performance are the two distinct attributes that separate PATH MAKER from the competition. Calcium chloride and Magnesium chloride combine to give PATH MAKER a fast-acting thaw that is unmatched by any other blended product on the market. Whether the temperature is 20 above or 20 below, PATH MAKER delivers an immediate, sustaining thaw that won't back down to any type of winter weather - ice, snow, or the treacherous combination of both. PATH MAKER is an easy to see, blue-dyed product that allows for proper application. It takes the tedious, backbreaking work out of de-icing while optimizing safety to pedestrians. Keep your sidewalks, commercial entrances, parking lots and high traffic walkways clean with the blend that outperforms the competition again and again.

LOW TEMPERATURE PERFORMANCE

Calcium chloride and Magnesium chloride combine to make PATH MAKER fast and effective in any type of winter weather, even when the temperature drops to -20°F.

BLUE DYE

PATH MAKER contains blue colored melting crystals to better indicate the spread pattern during application. The dye is harmless and soluble in water, therefore it will not stain concrete or your hands.

MINIMIZE TRACKING

PATH MAKER contains high percentages of calcium chloride and magnesium chloride which significantly enhances the melting speed of the product. Because Path Maker works so quickly, the chance of product being tracked in from foot traffic is greatly reduced.

SAFE TO THE OUTDOORS

PATH MAKER is tough on winter snow and ice, but safe to vegetation and wildlife when used as directed.

SAFE ON CONCRETE & TREATED WOOD

PATH MAKER does not contain any ingredients that will chemically alter or damage air-entrained quality concrete or treated wood when used as directed. The extended melting period allows more water to evaporate which helps prevent damage from freeze/thaw cycles.

NO HASSLE STORAGE & HANDLING

PATH MAKER has an unlimited shelf-life and needs no special storage or handling.

DIRECTIONS:

Spread at the rate of about 1/4 cup per sq. yd. Leaves no messy white residue to coat sidewalks or to be tracked into buildings. Remove the slush immediately to prevent penetration of porous areas and cracks in the concrete, as continual thawing and freezing action can cause damage to poor quality concrete. Will not harm carpet or floors when used as directed.
